

Age Curve Report Subscription Details

"If real wealth is to be created, it has to be invested generationally."
 –Scott Miner, chief strategist at Guggenheim Partners

Would you like to steer out of the investment fog and return with us to a "Back to Basics" approach for building wealth within the context of the emerging "Generational Opportunity?"

If so, we have something in common. We are all vulnerable when anxiety boils over into panic, or, conversely, when common sense gives way to greed. Our conservative "Back to Basics" philosophy stresses preservation of capital while in search of future higher returns.

Our disciplined "owners approach" to research places us in front of the crowd as we seek out generational undervalued assets. Our original research process is built upon the solid foundation of demographics, sentiment and valuation disciplines.

To demonstrate the success of our approach we have created the model Age Curve Master Portfolio. This allows subscribers of our demographic and investment report: The Age Curve Report to quickly understand our future investment approach, review its past and current holdings, and monitor its performance.

Our model Age Curve Master Portfolio is showing a current return of 79.0 percent, versus 29.7 percent

for the S&P Global Index since our "Generational Opportunity" buy signal of December 5, 2008.

As subscribers to our Age Curve Report we are committed to making sure that you have the information you need to profit from the ever changing demographic landscape within today's Generational Opportunity.

Subscribers to the Age Curve Report receive:

- ◆ Twelve monthly issues of the Age Curve Report;
- ◆ Thirty-six issues of the Age Curve Weekly Focus;
- ◆ Stock of the month in each issue;
- ◆ Portfolio updates for the model Age Curve Master Portfolio; and,
- ◆ Analysis and commentary into how to profit from the current changing American and Global Demographic Landscape.

Issues are e-mailed out in the first week of each month or available for download on our web site: www.theagecurvereport.com Also examples of previous reports and special issues can be found in our Age Curve Report web archive.

Subscription Rate: US \$299 per year or US \$78 quarterly, via web site sign up.

The information and data provided in The Age Curve Report reflect the views and opinions of Age Curve Consulting. The views expressed may change at any time. The opinions expressed in this communication are those of the author(s). No representation is made concerning the accuracy of cited data. Nor is there any guarantee that any projection, forecast or opinion will be realized.

Readers using this information are solely responsible for their own actions and invest at their own risk. Before making specific investments, further investigation is recommended. Although information contained in our publications is derived from sources which are believed to be reliable, they are not always necessarily complete and cannot be guaranteed.

The value of investments, and the income from them, can fall as well as rise and you may not get back the original amount invested. Past performance is not a guide to future performance. Certain securities referenced in the report's articles may be held in portfolios managed by any of the principals of Age Curve Consulting. References to these securities should in no way be deemed as an understanding of any future position, buying or selling, that may be taken by the principals. In addition, employees and associates of Age Curve Consulting may have positions in these securities.
